Maritime Safety Queensland

Personal Watercraft Licence - Practical Assessment Statement

The student <u>must</u> demonstrate competence in the following activities. An outcome <u>must</u> be identified for each activity.

Starting Operations					
The student has demonstrated:	Successful	Unsuccessful			
Ability to mount the PWC successfully					
Correct body position of operator					
Correct starting procedure					
Correct safety lanyard use					
Ability to safely start and stop the PWC					
Slow Manoeuvres					
The student has demonstrated:	Successful	Unsuccessful			
Correct steering management when moving forward, and in reverse					
Travelling at 6 knots, observing wash					
Maintaining speed and course whilst travelling in a straight line					
Maintaining appropriate throttle control					
Executing at least 2 turns to port and to starboard in a controlled manner					
Approaching a floating object in a controlled manner					
Performing a "man overboard" drill in a controlled manner					
The ability to describe or demonstrate the process to swap seats					
Manoeuvres at Speed					
The student has demonstrated:	Successful	Unsuccessful			
Control of power to smoothly accelerate onto the plane					
Maintaining speed and course whilst travelling on the plane					
Control of power to smoothly bring the PWC off the plane					
Avoiding a potential collision (Note: to be simulated with a safe floating object such as a fender)					
Performing a figure 8 whilst on the plane					
Berthing					
The student has demonstrated:	Successful	Unsuccessful			
Coming alongside a jetty or pontoon					
Departing from a jetty or pontoon					

General Operation						
The student has demonstrated throughout the assessment:		Successful	Unsuccessful			
Understanding use of throttle and steering control to perform tasks						
Understanding of water depth to ensure sufficient operation of the PWC						
Manage a correct steering position to maintain a set course						
Ability to consider traffic conditions / apply right of way procedures / correct use of navigation aids						
Ability to judge and manage distance off, of 30m / 60m						
Ability to judge and manage speed of 6 and 10 knots						
Constant situational awareness of wind, tide, obstacles and others						
An awareness of passenger safety at all times
